Before the FEDERAL COMMUNICATIONS COMMISSION Washington, D.C. 20554

LightSquared Subsidiary LLC Request for Modification of Its Authority for an Ancillary Terrestrial Component

FCC File Number: SAT-MOD-20101118-00239

Dear Federal Communications Commission:

I would like to take this opportunity to share with the Commission my views on an upcoming broadband policy decision regarding LightSquared. Specifically, I would like to comment on LightSquared's request to modify its operational range through an "Ancillary Terrestrial Component."

New wireless applications are changing the way we work, do business, raise families, educate children, and keep communities safe. Unfortunately, a spectrum crisis is looming. The good news is LightSquared is ready to put the valuable spectrum it owns to work.

By delivering an open network to wholesale customers who will then be free to create and offer the next generation of innovative wireless services, LightSquared is working towards the goal of achieving wireless broadband connectivity for all. Ultimately, LightSquared's plan means more economic opportunity for Americans so, I hope you will look favorably on LightSquared's request.

Respectfully submitted,

Councilman David Pearson Office of the Mayor and Council 8401 W. Monroe St. Peoria, Az. 85345
